Repair work at Ganga canal, low river flow a double blow

► Continued from P1

At the same time, we are unable to lift more water from the Yamuna because the water supply in the river is already very low compared to seasonal supply requirements," the official said.

While the repair of the Upper Ganga canal is an annual exercise which lasts for 10-15 days, it has not earlier overlapped with a short supply from Yamuna, a DJB official said.

"The treaty with neighbouring states, which include five basin states, says we can draw an equal amount of water from the Yamuna when the maintenance is being carried out, but the river right now has no additional water to lift. Supply from Carrier Lined Channel and Delhi Sub Branch canal is also on lower side. Right now, we are able to manage the situation by supplying water

Odisha's daily count dips below 2,000 mark for first time in two months

STAFF REPORTER
BHUBANESWAR

Odisha's daily spike in COVID-19 cases dropped below the 2,000 mark for the first time after two months, indicating improvement in the pandemic situation. The State on Monday reported 1,982 cases.

The last below 2,000 mark was recorded on August 13 when a single-day surge of 1,977 was reported and subsequently, the graph had seen a steady rise. On September 26, the highest single-day rise was recorded

at 4,356.

The drop in daily spike is attributed to continual decline in tests conducted in Odisha. The State government on Monday said 38,740 tests were conducted during the past 24 hours. The daily tests had once ranged from 50,000 to 60,000. During the past two months, Khordha district emerged as the worst-affected region, overtaking Ganjam. The COVID-19 tally increased to 2,70,346 on Monday after recording 1,982 fresh infections.
